### Notes

Email Notification: After successfully soft-deleting the user and updating the status in the DeleteAccountRequest table, an email notification is sent to the admin using Laravel's built-in Mail facade. Ensure you have set up your mail configuration correctly in Laravel (config/mail.php). Data Preparation: The \$data array contains information such as the user's name, email, and reason for deletion, which are passed to the DeleteAccountRequestSendAdmin mailable class. Admin Email: Replace \$adminEmail with the actual email address of the admin who should receive the notification. You can fetch this dynamically from your application settings or configuration. Make sure you have created the DeleteAccountRequestSendAdmin mailable class that accepts these parameters (\$name, \$email, \$reason) and formats the email content appropriately. This approach ensures that whenever a user is deleted, an email notification is sent to the designated admin email address with
